

# BOELUBE®

Machining Lubricant

Developed by The Boeing Company.

## TOOLS RETAIN THEIR CUTTING EDGE LONGER

It is a registered trademark of the Boeing Company. It fights friction at the interface of the cutting edge and the workpiece. The reduction of friction at these surfaces minimizes heat generation and concurrent chip weld.

## GREATLY IMPROVES TOOL LIFE

High film strength and lubricity and unique polar properties are the keys to its ability to provide superior lubrication.

A small amount of Boelube®, which is consumed in the metalworking process, will greatly improve tool life, surface finish and hole quality. Minimizes heat generation and concurrent chip weld.

Before drilling into metal (or anything, for that matter, but especially metal), dip your drill bit into the blue paste and drilling will be smooth sailing. The heat generated from friction will lubricate while drilling.

*Best stuff I have found for drill lubricant.  
Cannot say enough good stuff about it.  
-Kurt Knutsen*

Part # /OLB-70307-2

Non-toxic, non-irritating and biodegradable.  
Non-corrosive, non-flammable, chemically stable  
and free of halogens, heavy metals, sulfur, phosphorus,  
silicone, petroleum and paraffin wax.

Boelube does not contain any ingredients considered a hazardous substance by OSHA, WHMIS, IARC, NTP, and State Regulatory Lists

**A small amount of Boelube®  
is all you need.**
